ROSS SEA ODYSSEY - DEEP SOUTH EXPEDITION FROM DUNEDIN, NEW ZEALAND

Experience one of the most remote, historic sectors of the deep South in comfort on this exploratory expedition aboard the luxurious Douglas Mawson. Your journey begins in the subantarctic, where yellow-eyed penguins waddle through wizened r t forests and royal albatross nest amid megaherb moors. Cross the Antarctic Circle and cruise the pack, keeping watch for emperor and Adelie penguins porpoising along the ice edge, orcas patrolling for prey, and snow petrels soaring against a backdrop of the vast Antarctic Ice Sheet.

Embrace the spirit of adventure as you continue along the Victoria Land Coast and into the Ross Sea, where the Antarctic Ice Sheet flows into the world's largest floating ice shelf. These are historic waters, where the explorers of the Heroic Age staged their bold assaults on the South Geographic Pole. Hear the stories of their expeditions and attempt to land at some of their remarkably well-preserved huts.

ITINERARY

Day 1 Arrive Dunedin

Arrive in Dunedin, where you will be met by a representative of Aurora Expeditions and transferred with your fellow expeditioners to your assigned pre-voyage hotel. If you are already in Dunedin, we ask you to make your way to your hotel. This afternoon, visit the Aurora Expeditions hospitality desk in the

lobby to collect your luggage tags. Please clearly label the tags with your name and ship cabin number. Our team will confirm details regarding your embarkation day, answer any questions and provide you with information on where to dine or purchase last minute items.

That evening, enjoy light refreshments as you meet your fellow expeditioners at a Welcome Reception and Pre-Embarkation Briefing. Afterwards, enjoy your evening in New Zealand's southernmost city. You may like to indulge in a meal at one of Dunedin's fine restaurants, or perhaps enjoy a leisurely stroll along the picturesque Otago harbour.

Assigned accommodation: To be advised

Day 2 Embarkation

This morning, enjoy breakfast and check-out. Please ensure your cabin luggage is fitted with cabin tags clearly labelled with your name and cabin number. By 11.00 am, take your cabin luggage to hotel reception, prior to, or at check-out. Your luggage will be stored and transferred directly to the port for clearance, to be placed in your cabin ahead of your arrival on board. Please keep any valuables or personal items with you throughout the day.

Your morning is at leisure to explore Dunedin.

Settle into your cabin, where each detail was designed with your comfort in mind. This luxurious vessel is yours to explore! As we throw the lines and set sail, join your expedition team on deck before tucking into a delicious dinner, and toast to the voyage ahead.

Day 3 At Sea

On an expedition such as this, the journey is as significant as the destination. Sea days are a wonderful opportunity to relax, meet your fellow travellers and learn about the history, environment and local wildlife in this fascinating corner of the globe.

As you acclimatise to life on board, your expedition team is available to answer any questions you may have and offer pro-tips on photography and

birdwatching. With decades of collective experience in the region, they love to share their expertise and enthusiasm with fellow travellers. Join them in the lecture room for entertaining talks and presentations to enrich your understanding of the wildlife, landscapes and historic sites we hope to encounter.

You may like to pamper yourself with a sauna, a visit to the Wellness Centre, or work out at the onboard gym. While away the hours spotting seabirds on deck, curl up with a book in our well-equipped polar library, or chat with your fellow expeditioners at the bar.

Days 4-6 New Zealand's Subantarctic Islands

First visited by Mori navigators centuries ago, these islands are of great significance to Ngāi Tahu, the indigenous peoples of New Zealand's South Island. Their natural beauty and astonishing biodiversity have now been recognised globally, but few have had the privilege to visit these far-flung shores, which are now yours to explore.

Days 7-10 At Sea

As Campbell Island slips over the horizon, keep watch for Campbell, Salvins and white-capped albatross, which may follow the ship to bid us farewell as we continue south.

Close observers may notice a subtle change in the character of the sea as we cross the Antarctic Convergence. Beyond this belt where the waters of the north and south mix, the sea surface temperature drops by about 4°C (39°F), signalling our entry into the Antarctic. This transition zone is known for its nutrient-rich waters, so keep watch for porpoising penguins, flocks of fluttering Antarctic petrels, or perhaps the more solitary snow petrel. You're not far from the Antarctic Circle, so your first iceberg can't be far away!

Sea days are a great opportunity for some R & R as you digest your subantarctic experiences and prepare for the next phase of your voyage. Relax and unwind your way, perhaps meeting newfound friends at the bar, treating yourself to a sauna, or editing some images in the comfort of your cabin. And join your expedition team in the lecture room for presentations on the

charismatic wildlife and extraordinary adventures that took place along the epic Antarctic coastline you are about to experience.

Days 11-17 Victoria Land Coast and the Ross Sea

It's almost impossible to describe the feeling of arriving in this storied, ice-bound sector of Antarctica. Stepping outside and taking a deep breath of some of the most fresh, crisp air on earth is an experience to cherish forever.

The Ross Sea region is a globally significant wildlife sanctuary. Its nutrient-rich waters support an astonishing array of uniquely adapted Antarctic species, including Ross Sea orcas, Antarctic petrels and South Pacific Weddell seals. It is also home to Antarctica's largest Adelie penguin colony, and many of the largest emperor penguin colonies. The unique biodiversity of the Ross Sea has been protected within the world's largest marine protected area since 2016.

The human heritage of the Ross Sea coast is equally impressive. Since James Clark Ross discovered the region in 1841, countless expeditions have built base camps on scattered ice-free slivers of land, using them as staging posts for bold forays across the polar plateau. Many of them departed in a hurry, leaving artefacts, scientific equipment and sometimes entire huts behind. Today these sites are preserved as open-air museums and protected under the Antarctic Treaty System.

Embrace the spirit of exploration as your expedition team designs your voyage from day to day, bringing decades of experience to selecting the ideal sites based on the prevailing weather, ice conditions and wildlife opportunities.

Days 18-20 At Sea

We leave the grandeur of the ice to the seals and penguins and head northwards, but our voyage is far from over. In the days ahead there is plenty of time to enjoy the magic of the Southern Ocean and the life that calls it home. You won't want to miss presentations from your onboard specialists about the wonderful wildlife and rich human history of Macquarie Island.

These days at sea also offer time and space to reflect on the emotions and special moments you've lived over the past few weeks. You may like to take a

moment of quiet contemplation or reminisce with your fellow travellers over a cuppa (or other beverage of choice!)

As you approach Macquarie Island keep watch for graceful grey-headed, black-browed and light-mantled albatross, which may venture from their nests to welcome their human visitors.

Days 21-22 Macquarie Island

"Penguins were in thousands on the uprising cliffs, and from rookeries near and far came an incessant din . . . seabirds of many varieties gave warning of our near approach to their nests" Douglas Mawson, 1911.

As they sailed towards Antarctica, Mawson and his men encountered 'an exquisite scene'. Macquarie Island (known affectionately as Macca) rises steeply from the Southern Ocean in a series of emerald summits: a beautifully fierce, elemental landscape teeming with life.

Keep your binoculars handy because this subantarctic refuge is home to 3.5 million breeding seabirds, including no less than four species of penguin! Alongside boisterous colonies of tuxedoed kings, charming gentoos, robust rockhoppers and endemic royal penguins, you'll find three types of fur seals and a large proportion of the world's elephant seals. Layer up and head out on deck to experience the sound, sight (and smell!) as you approach one of the largest concentrations of life in the Southern Ocean.

Remember to keep an eye out for Macca's kelp forests--these remarkable underwater ecosystems are quite mesmerising as their fronds sway back and forth on the water's surface.

In addition to being a globally recognised and protected wildlife refuge, Macquarie Island played an important role in Antarctic history. It was here, in 1911, that five men disembarked Mawson's Aurora and established a radio relay station which would transmit the first communication from Antarctica to the outside world.

As your journey draws to a close, take some time to reflect on the experiences of the past few weeks. Perhaps take some time to organise your photos, jot some more notes in your journal or simply relax and soak up the ambiance on board as you farewell your travel mates . . . until next time!

We hope you become ambassadors for the great Southern Ocean, advocating for its conservation and preservation, and share your experiences with your loved ones, so they might visit and become ambassadors themselves.

Day 25 Disembark Dunedin

After breakfast, farewell your expedition team and fellow passengers as we all continue our onward journeys, hopefully with a newfound sense of the immense power of nature.

Note: At the conclusion of the voyage, we do not recommend booking flights departing prior to 12.00 pm on the day of disembarkation in case there are delays.

Please note:

Itineraries are subject to change.

YOUR SHIP: DOUGLAS MAWSON

YOUR SHIP:	Douglas Mawson
VESSEL TYPE:	Small Ship Expedition
LENGTH:	
PASSENGER CAPACITY:	154
BUILT/REFURBISHED:	2025

Length: 104.4 m

Setting sail in 2025, the Douglas Mawson is the latest addition to Aurora Expeditions' fleet of purpose-built small ships, designed for global discovery and adventure in comfort. Named after the pioneering Australian geologist and explorer, this state-of-the-art vessel combines cutting-edge technology with elegant design, featuring the revolutionary Ulstein X-BOW® for smoother sailing and enhanced sustainability. With space for up to 154 guests (130 on expedition voyages), it offers an intimate and environmentally conscious cruising experience. Multiple observation areas, a heated pool, Jacuzzis, and a sauna ensure guests enjoy both exploration and relaxation in equal measure. On board, passengers can delve deeper into their destinations through engaging lectures in the theatre, hands-on learning in the Citizen Science Centre, and peaceful moments in the library or observation lounge. Dining is relaxed and sociable, with open seating, hearty cuisine, and complimentary beverages with dinner. Accommodation options range from luxurious suites with private balconies to well-appointed solo staterooms, catering to every traveller's style and comfort. Whether navigating the polar regions or exploring the British Isles and Mediterranean, the

Douglas Mawson delivers the perfect balance of adventure, discovery, and refined small-ship luxury.

hip luxury.
